Management Commentary | Quarter ended June 30, 2026

Results

Q2 revenue of \$23.5M was down 1.7% from Q1, reflecting lower project volume in the Gulf Coast region, which represented 38% of revenue in the quarter. Adjusted EBITDA margin declined to 16.8% as technician wage inflation continued and contract repricing lagged. The revolver was fully drawn in June to fund working capital. In July, management launched a cost program targeting \$2.0M of annualized savings, principally through subcontractor consolidation and overhead reductions, with the majority expected to be realized in Q4 2026.
